In order to run the the chatbot ensure the program is run on an environment that consist of following libraries.

```python
from nltk.corpus import sentiwordnet as swn
import nltk
from nltk.stem.lancaster import LancasterStemmer
import numpy
import random
import json
import keras
import numpy as np
import pyttsx3
import pandas as pd
```

Furthermore ensure the two input files "Chatdata" & "metadata_movies" is located in the same folder as the program.

Beyond that to run the program use command: python ChatBot.py

Thank you.
